

RL47A

ENGINEERED FOR HIGH SPEED DURABILITY

E-4 RIGID DUMP TRUCKS

RL47A

E-4 RADIAL TIRE

FASTER. COOLER. LONGER.

Engineered for cooler running to handle longer high-speed hauls, the RL47A is all about helping your earthmovers get the job done faster and more efficiently.

Thermal Reduction Architecture

Specially designed features on the shoulder blocks provide for extra heat dissipation in this critical area of the tread.

Heat Dissipation Grooves

Precise grooves are strategically placed across the tread to effectively disperse heat from the tread area for faster, longer hauls.

Diverse Compound Options

The RL47A is available in four different compound options to meet the tough demands of specific applications.

Large Ground Contact Area

A larger, flatter footprint distributes weight more evenly and provides excellent cut resistance and longer service life.

SIZES AND SPECIFICATIONS

SIZE	ITEM NO	STAR MARK	COMPOUND	GROOVE DEPTH 1/32	RIM SIZE	INFLATED DIMENSIONS (INCHES)		STATIC LOADED RADIUS (IN)	STATIC LOADED WIDTH (IN)	SHIP WEIGHT (LBS)
